

Storage drawers and storage space under Twin adjustable beds.

- Our storage drawers are handmade, high quality and very strong. There is no point buying a high quality bed to last years with cheap drawers which the bottom will fall out of if overloaded.
- We offer drawers set in the foot end or on each side towards the foot end.
- Easy open and close drawers with steel runners and guide wheels.
- A neat finger pull along the bottom edge rather than knobs or handles.
- Designed to be very easy for self-assembly. Both the drawer and carcass are already assembled.
- We do not supply drawers at the head end as these interfere with the mechanics of the adjustable bed. However, raising the headend will open up a useful storage space.

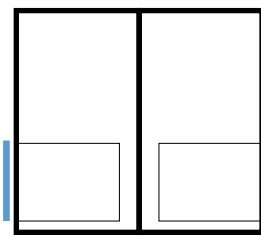

Simply by using the hand control to raise the head end opens up a useful storage space. Many of our customers will opt for drawers in the foot end and place plastic storage boxes in the top end of the bed to take advantage of this. Please select your drawer option from the drop down menu.
